

Christos Panayiotou

Assistant Professor
Department of Electrical and
Computer Engineering
University of Cyprus

Personal Profile

Christos Panayiotou has received a B.Sc. and a Ph.D. degree in Electrical and Computer Engineering from the University of Massachusetts at Amherst, in 1994 and 1999 respectively. He also received an MBA from the Isenberg School of Management, at the aforementioned university in 1999.

From 1999 to 2002 he was a Research Associate at the Center for Information and System Engineering (CISE) and the Manufacturing Engineering Department at Boston University. During 2002- 2003 he was a Visiting Lecturer at the Electrical and Computer Engineering Department at the University of Cyprus. Currently, he is an Assistant Professor with the Electrical and Computer Engineering Department at the University of Cyprus.

Research Profile

His research interests include optimization and control of discrete-event systems with applications to computer communication networks, manufacturing systems and transportation networks.

When a mobile phone is switched on, although we don't use it, it receives and sends signals to the various antennas in the surrounding space. Computers can locate this as GPS does with satellites.

This was initially demanded by the emergency services. The need to locate a mobile phone came initially from the emergency services, as they want to be able to locate a call being made to them from a mobile phone.

Other interests

Cristos is a great Basketball player but also likes computer games of courses.
